About This Game

WELCOME TO
FACILITY 7,
PRISONER

You are a prisoner, trapped in a strange facility, filled with deadly traps and whispered secrets. At first the facility and its inhabitants all seem like a mystery to you, but soon you begin to understand: Your only chance to survive is to master the Magnet Gun and stay out of harms way. If you make yourself useful they will let you live a little longer, and sooner or later you will get your chance. As the Warden keeps on telling you: "There is always a way out..."

GAME FEATURES

Unique Tool - The magnet gun is a unique tool that can transform the environment, launch you through the air or assist with complicated box puzzles

What a horrible, gigantic mess this is. I keep looking for a snowboarding game on PC and thought I'd give this a shot, wow...just bad, in every possible way. Bad controls, bad menus, bad tracks, bad progression, did I mention it was really bad?

Avoid at all costs.. To be honest, I did not spend too much time in AC these days, being more dedicated to rF2 and AMS because of the physics. However, when I saw the incoming Porsches, my hours spent in the Porsche Unleashed installment of the NFS series kicked in, and I simply couldn't resist. So here are my views:

POSITIVE:

- + wide variety of cars with vastly different handling
- + beautiful models with rich details
- + probably the best virtual dashboards ever
- + the unique Porsche feeling (the constant smile on your face)
- + huge boom on online servers (at least on day one) - the feeling of driving around Nordschleife surrounded by different kinds of Porsches

NEGATIVE:

- serious extent of sleep deprivation
- unwillingness to move out of the flat, generally turning anti-social
- making you realise that this is the closest you'll ever get to the cockpit of a 918 Spyder (or any other P.)

I already had a lot of fun races with the GT4 Cayenne, while comparing the 917 Spyder to the 918 Spyder on the Top Gear Test Track is a uniquely immersive experience. The old beast bites you in the buttock, while the 918 is soo gentle and so powerful at the same time. And I don't even have to say that these cars probably came into existence for the sole reason of entertaining you around Nords.

Verdict: this DLC is so good that you'll fall in love with AC. Again. And again.

Video of the 918 doing a lap around Top Gear Track: <https://youtu.be/Bh00BHBHf8I>. Rack N Ruin is a quite and surprisingly good game that has some problems which prevents this game from being one of better this year I've played and probably one of my favourites this year. Gameplay is fun, because you will kill a lot of different monsters, people and bosses with your fire (your first skill) as you progress on your quest to conquer the world.

<https://pcgamesnews.wordpress.com/2015/11/14/review-rack-n-ruin/>. It's really hard to pin this game into a genre. It's an exploratory puzzle game, but feels kinda like an idle game and definitely has a storyline. It's uinique and quirky and if that sounds like something you might be interested in, I recommend it.

<https://www.youtube.com/watch?v=c1ER8sdCeF4>. Not the best point&click on Steam but for a small money you can have few hours of fun. Dialogues are too long sometimes and the guy in the glasses can be boring, he tries too hard with the jokes.. \u2665\u2665\u2665\u2665 you. As someone who is relatively new to this, I must say I find this game really interesting and great fun! If I can relax and concentrate a bit better then I may be able to complete it one day! I would recommend this game to anyone who likes a challenge.

Your go for karaoke experience on PC. Lack of DLC or any extra content, but there's plenty of songs to go through. Heard they fixed a lot of issues in the sequel, so if you can afford it get the 2016 version instead.. Well the most frustrating and rage inducing game i ever tried. Maybe i am an idiot but the controls are just not good enough to do the levels where you have to be fast because the tiles break after like 2 seconds under you. The ball feels too much unresponsive to be able to stop it at the precise moments.

Okay there are levels where i can take the slower approach(i will never think about doing the time records) but where you have to be fast and do things with good reflexes the controls feel to unresponsive for fast movements. Or maybe it is the physics of the ball that it needs some time to stop or turn so maybe it is me only that are not used to these kind of games but it is really hard for me maybe i should try it with a controller and would have better results.

So all in all if you like hard(i mean really hard at least in my point of view) games where you need good control skills and good reflexes you will have a good time with this game and i recommend it but for those who can't take multiple fails in seconds steer clear or you will rage like hell(or like me). So for gamers who like casual puzzles i wouldn't recommend it even if it is saying casual in the game tags.. Must have VR game!

I've played all the boxing VR games, this is my favorite offline and the only one with online.

Feel free to add me if you download, im always looking for a fight

. Honestly a very fun experience, and a zombie apocalypse story with a unique playing style. I don't think I've seen a zombie game quite like this one. Well done and diverse characters and fun romance scenes. Some lackluster components, very short, and a questionable ending though. All together a 7.5/10. The Mystery P.I. games are the series that got me into hidden object games a few years ago. That being said, it was a few years ago. These games have aged much better than a lot of the HO games from around 2009 though. The biggest complaint could be that you repeat scenes during the game, but new ones added in to keep it interesting.

There is no real story or voice acting that you see frequently today, though I don't think that is a real loss. What there is though, is a lot of quality HO puzzles with occasional simply solved arranging picture style puzzles between stages. If objects out of size perspective bothers you though, i.e. pencils the size of skyscrapers, avoid this like the plague.

tl;dr: quality old-style HO game, worth your while on sale.. If you want an old school hard arcade style game, this is for you. Otherwise don't waste your time.

This game is pushing right on the edge of a good game, the problem though is the lack of any modernisation. The game view is just too small and the renderer hasn't been updated to use bigger and wider screens. The controls are not customizable and there are no instructions. Your craft is too slow which makes the game too hard. **THERES NO SAVE FEATURE! YOU ONLY HAVE A FEW LIMITED LIVES!**

The game is basically unplayable for any longer than a short time, unless your a masochist or a bullet hell ninja. It's a real shame too, because the game play was fun and exciting with lots of interesting enemies and powerups. What might have been :(This game is worth picking up for the sick beats alone. Gameplay is cool aswell. Addicting. Rage.
